RE: Federal Center Facility-607 Hardesty Avenue, Kansas City, Missouri

Dear Mr. Hartshorn:

I have reviewed your March 8, 2004, letter containing the environmental issues summary and environmental remediation schedule for the Federal Center facility. The remediation alternative evaluation schedule for the chlorinated solvents in groundwater at the site is approved for implementation.

I need additional information in order to complete the remediation schedule you are requesting for the entire facility. Please be aware the Missouri Department of Natural Resources does not issue a remediation schedule but merely approves a remediation schedule for early transfer purposes. Once the former above ground storage tank chlorinated solvent remediation schedule is approved a site wide remediation plan can be prepared. The remediation schedule should then be prepared and submitted for department approval. The department suggests a timeline schedule needs to be submitted for each remediation plan related to the on-site contamination at the Hardesty Federal Complex. This could be similar to the regulated tanks corrective action plan. The timeline should include the work to be performed (i.e. tank CAP) duration in days for completion of each work task, quarterly timeline showing task, progress, milestone, and summary.

This timeline schedule will be necessary when the early transfer document is submitted to the Governor for approval.

If you have any questions please call me at (573) 751-7538, or P.O. Box 176, Jefferson City, Missouri 65102-0176.

Sincerely,

HAZARDOUS WASTE PROGRAM
